

Christian Renz Algenio is a dynamic professional in the field of Microbiology. He obtained his Bachelor of Science degree in Biology with a specialization in Microbiology from the Polytechnic University of the Philippines. With a passion for the intricacies of the microbial world, his career revolved around cutting-edge research and practical applications. One of his recent notable endeavors explores the properties of Tempol, a nitroxide compound, using computational target fishing and inverse molecular docking. As a burgeoning scientist, he has been significantly shaped by the mentorship of his research adviser, Mr. Ace Bryan Cabal, a distinguished faculty member within the Department of Biology of the same university. Currently, he serves as the Central Laboratory Microbiologist at Asia Brewery Incorporated. In this role, he plays a pivotal part in ensuring the quality and safety of beverage products. His responsibilities encompass comprehensive microbiological analysis of beverage samples, ensuring that they conform to rigorous specifications. Beyond his academic and professional pursuits, he finds solace and inspiration in the pages of books and is also an avid lover of the outdoors.
