

PhD Maricarmen Hernández Rodríguez.

Head of Cell Culture Laboratory at the Escuela Superior de Medicina of the Instituto Politécnico Nacional in Mexico City.

My Research work is focused on the search for new pharmacological targets for the treatment of Alzheimer's disease (AD).

During my career, I was awarded the Research Award by the Instituto Politécnico Nacional in 2014.

I have obtained 5 funding projects from Instituto Politécnico Nacional and Consejo Nacional de Humanidades Ciencia y Tecnología in projects related to topics in the area of new drug design. The academic production includes 26 research works in high-impact indexed journals and 4 book chapters.
